ksche@bosqueschool.org

6:40 pm Doors Open

7:00 pm Kids & the Wilderness: Student film by a
Bosque School 2009 graduate

7:20 pm Screening: Restoring a Legacy: the Rio
Grande bosque

8:00 pm BEMP Activities

The 180 mile middle Rio Grande corridor is an ever changing natural delight and legacy. Visit the beautiful Bosque School campus and see how the 'Bosque Improvement Group', a conglomeration of local organizations and agencies, are working to restore and revitalize this necessary water resource and surrounding areas in "Restoring a Legacy" The Rio Grande Bosque. Highlighting former US Senator Pete Domenici and current US Senator Jeff Bingaman, this film overviews the some of the research, monitoring and habitat restoration projects along our beautiful river and *bosque* (riverside forest).

This Bosque School film series venue will give the audience a chance to meet several "Restoring a Legacy" film "stars", get a hands-on approach to BEMP monitoring and will also spotlight an alumni student short film about kids and wildlife.

~ Organized by Bernalillo County Open Space: FREE admission to all films! ~
